Google Cloud

Build intelligent agents with Agent Development Kit (ADK)
Module 3: Architecting multi-agent systems

Now that you've learned to design and architect multi-agent systems, orchestrate multiple agents, and enable tool-augmented interactions with ADK, you can learn more about building multi-agent systems by watching an expert-led session and exploring the AI/ML Cloud Architecture Center for reference architectures and design patterns below.

- Build multi-agent systems with ADK (starts at 11:30): Watch an expert-led session introducing ADK concepts and exploring tips, tricks, and best practices for building multi-agent systems.
- Cloud Architecture Center: AI/ML: Explore reference architectures and design patterns for building scalable and robust AI/ML solutions, including those involving agent systems.
